

# Enrichment Homework

## Summer 2

**Year Group:** 6

**Subject:** Geography

**Link to learning:** This term, year 6 are studying weather and climate. Their topic allows them to explore the Earth's climates and how this varies across the world. Children will have the opportunity to investigate areas with extreme temperatures.

### **Task:**

Choose a place of interest from around the world and create a non-chronological report about the area. Ideally, the place you select you will know very little about. The place may also have an extreme climate. E.G Dallol, Ethiopia. The hottest inhabited place on Earth.

### **Expectations:**

- You will need to research the area in depth.
- This work can be completed on electronically or hand-written.
- Include: A title, subheadings, captions, pictures and diagrams.
- Include: Population size, seasons, the climate of the area, where this place is in relation to the equator, graphs (rainfall, average daily sunlight, temperature). Does this place have any extreme weather?

**Due date:**

Monday 18th July  
2022
