

Enrichment Homework

Autumn 1

Year Group: 8

Subject: Computing

Link to learning:

During this half term, in class we are going to be learning about the internet and developing a web page

Your task:

To create a learning aid to teach Year 7 how a search engine uses information to rank search results and how these results can be influenced by search algorithms

Expectations:

- research how a search engine uses information to rank search results and how these results can be influenced by search algorithms
- You need to include a short video of yourself explaining the information that you have learnt - remembering who your target audience is.
- create a handout to help Year 7 remember what you have taught them this can be typed (font no larger than 14) or handwritten (neat and legible). Remember to make your layout clear, eye-catching and easy to read.

Due date:

Monday 17th
October 2022
